i drive a truck for a living, and having xm radio allows me to listen to the radio in places i would not otherwise be able to, and that includes weather and traffic reports also. being a truck driver, weather and traffic are very important, and i should not have to switch back to regular radio to get updated, being as i am paying for xm radio service already. i would very much appreciate xm radio continuing to broadcast the weather and traffic, since thats what i listen to. i am sure that the may others out there with xm radio feel the same as i do. please consider all of out there when making your decision.

sincerely,

billy l. ward
